COMPUTER ZONE NAMED A TOP 100 HEALTH-CARE VAR BY CRN MAGAZINE

Leading Publication for VARs and Technology Integrators Cites Computer Zone as One of the Best Healthcare VARs in the US

Rockingham, NC, November 17, 2010—Computer Zone, a leading provider of software and services for medical organizations, announced today that it was named as one of the Top 100 Healthcare VARs by industry publication CRN. The CRN Top 100 list is devoted solely to those IT resellers that are focused on healthcare or that have divisions dedicated to the vertical.

In naming Computer Zone, CRN cites that Computer Zone is a total solution provider for healthcare organizations, with a range of products and services, "offering everything from EHR and practice management software suites to medical billing services, automated backup, technical support, custom development, application hosting and remote service options." Joining Computer Zone on the list, companies named to the Top 100 include many of the leaders in the industry including Accenture, Deloitte Consulting, Cap Gemini, Quadramed and Trizetto.

In addition to offering leading software products and a wide range of services for both medical practices and hospitals, Computer Zone delivers these products using a unique implementation methodology that is unique among healthcare VARs and technology integrators. This methodology delivers an end-to-end solution tailored to each customer and that begins with software selection through workflow consulting and on to on-going technical support and upgrades.

"We are proud to be named to this prestigious list with many of the biggest names in healthcare," said Sandy Huggins, vice president of Computer Zone. "Computer Zone offers the right mix of products and services to provide complete solutions to healthcare organizations both large and small, and we appreciate this recognition of the job we are doing for our customers every day."
