

Seamless Collaboration for the Future of Work

Empower your mobile workforce with cloud-based workspaces

Digital transformation is key to boosting growth, improving agility, increasing profitability and preparing a mobile workforce for the future of work. Virtual environments hosted in the cloud that combine voice, video and cloud storage with desktops and applications, called cloud-based workspaces, give employees the flexibility to work from anywhere, on any device. What's more, they allow IT teams to lower costs, eliminate the overhead of disparate systems, and enable seamless remote and hybrid collaboration.

Connected Workspace powered by Star2Star

Connected Workspace powered by Star2Star is a cloud-based workspace solution that combines secure and reliable virtual apps and desktops, cloud storage, and anywhere, anytime access for a seamless digital experience. With Connected Workspace, your business can prepare for the future of work while unlocking productivity and improving your bottom line!

Connected Workspace Enables Remote Work for Every Business

Connected Workspace powered by Star2Star includes best-in-breed technologies that deliver a streamlined remote-enabled workplace experience for every business in nearly every industry or vertical, including:

Healthcare

The healthcare industry has considerable communications needs, including critical alerts and collaboration between patients and care providers. With Connected Workspace, healthcare organizations can effectively equip a mobile, highly dispersed workforce with secure and compliant Unified Communications.

Law

Fast, consistent and confidential communications are a must in the legal profession, especially for workers who are frequently on the go. Connected Workspace gives employees secure access to important documents, such as briefs and more, track critical appointments and meetings, and enable seamless collaboration with colleagues.

Finance

Those in the finance industry routinely handle large quantities of sensitive data and need to be continuously apprised of minute-to-minute fluctuations in the market. Connected Workspace offers secure and reliable connectivity from any location for just-in-time communications with full client confidentiality.

Accounting

Accountants encounter numerous communication challenges in their day-to-day work requiring fast and reliable connections. Connected Workspace provides better organization for critical documents, compliance oversight for business continuity, and fully customizable features to manage seasonal business needs.
